### About me

My biggest dream was to become an actress; it was something I was passionate about from a very young age. I applied to the Dramatic Arts Academy and was accepted, but unfortunately two weeks before I was supposed to start classes, I lost my sight. When that happened, I thought my life was over. I then heard about the Light and Healing Center and the aromatherapy course they offer. I decided to join the course and fell in love with it.

### Why am I doing massage therapy

I love that I can make other people feel good.

### What are my goals & dreams

I plan on opening my own massage studio once I complete this course.

### What I am thankful for

I feel extremely blessed to be doing this course because when I lost my sight, I felt broken and being able to make a difference in people's lives with every massage makes me feel whole again.

So then, if you would like to book a treatment with me, please contact the Light and Healing Centre.

I look forward to meeting you!

Danelle
