About me

I am a curious person who loves digging into things. When I became blind, I thought that it was the end of everything. I had to learn to depend on assistive devices and courses to be able to 'see' again. Even though my vision was taken away, I knew that there was something more within me.

When the door of my vision was shut, the Light and Healing Centre opened another door for me - the sense of touch, of being tactile, the sense of feeling.

Why am I doing massage therapy

Massaging people gives me a sense of touching into their souls. Massaging is within me, it is not an assistive device, it was there all along. That sense has been reawakened. My goal is to let the clients feel that they can tap into a new space, that they have within them but never knew. Massage enables me to go with them to a realm that is inside their body.

What are my goals & dreams

My end goal is to always take light and healing with me wherever I go. Because light at the end of the day, is what blind people need. I also want to become a therapist and to make everybody see the value of a massage.

If you would like to book a treatment with me, please contact the Light and Healing Centre.

I look forward to meeting you!

Debbie
