About me

Before I joined the Light and Healing Centre, I felt that my disability of being blind caused others, especially employers, to limit my ability in the workplace. Like many other people in my situation, finding the chance to work has been a difficult and disappointing journey.

When I was told about the Light and Healing Centre's aromatherapy programme, it was like the light, or in my case, the sound at the end of an extra dark the tunnel.

What are my goals & dreams

Through aromatherapy message I can feel free to reach my potential, and to use the ability of being blind as a benefit to my clients.

What I am thankful for

Aromatherapy to me represents the opportunity to give to others, as I have received so much.

So, I would like to invite you to come have the Light and Healing experience.

I look forward to your visit!

Grant
